

Fully customisable Certificate II resources available now!

## New industry-focused resources to support Certificate II, III and IV in Water Operations

Government Skills Australia (GSA) is pleased to announce a suite of resource materials aligned to Certificate II of the NWP07 Water Training Package, now available from GSA. Resources to support Certificate III and IV are under development and will be available by the end of 2009.

Funded by the National Water Commission under GSA's National Water Learning Resources (NWLR) project, these resources have been developed through extensive consultation with industry over a two year period.

Products developed under the NWLR project consist of CD-ROMs containing fully customisable MS Word and/or PowerPoint versions of the following resources developed for each of the units of competence within Certificate II, III and IV.

- Learner Resources;
- Facilitation Resources – PowerPoint presentation, session outline and responses to activities contained in the Learner Resource; and
- Assessment Tools.

Material to support individual units of competence are available for purchase separate to the complete suite.

Availability of the material developed under the NWLR project will address major learning resource gaps that exist within the water industry. GSA intends these resources to assist in the provision of a skilled workforce for Water.

The materials are intended for use by enterprise and RTOs and can be purchased by return of this order form.
